

“In the last 25 years we’ve moved four times. And each of those four times we needed to have new kitchens. Our first new kitchen was exquisitely built and installed by Mr Paul’s Custom Cabinetry. They were recommended to us by a local architect, so we included them on the bid list, and they were selected.

Based on their professionalism, quality and value there was no reason to have anyone other than Mr Paul’s build our other three kitchens. We knew what we were getting each time and were totally satisfied - before, during and after completion.

Mr Paul’s is a family business who goes to extremes to satisfy their customers. They have quality craftsmen who respect your home as if it was theirs. They never leave anything just 99% complete - it is always 100% perfect - which always left us 100% satisfied.

In addition to the four kitchens, we also had Mr Paul’s Custom Kitchens design and build a custom bathroom, elaborate entertainment built-ins and custom wainscoting along the way. We know of several other families who have utilized them to design and build their dream kitchens based on seeing our kitchens.

If you want a custom kitchen you can be proud of we highly recommended Mr. Paul’s Custom Kitchens – their pride, quality and lasting value is reflected in the finished product.

As an aside, the first of those four kitchens are in a home we eventually sold to our daughter; and that kitchen is as beautiful and functional today as it was when first installed – truly built to last.”
