

I met with Paul Sr. and Claire Waltsak in the spring of '06 to design a kitchen in the house I was building. I had no experience with picking out a kitchen before, so this was all foreign to me. I had a few ideas of what I wanted but that was all. When I met with Paul and Claire, I gave them my ideas and what my style and taste was then left everything in their hands. Well, what they came up with surpassed anything I could have ever dreamed of. It was like they were inside my head and new exactly what I wanted. It was amazing! The design and attention to detail was beautiful. When it was installed in my home, I fell in love. My kitchen was just what I imagined. Everything from the mantle hood over my cook top to the legs on my island to the coordinating bar in my family room. Paul's eye for detail and Claire's decorating ideas were straight on. Everyone knows it doesn't matter if you have a big or small home, when entertaining everyone always seems to flock to the kitchen. So when you have a kitchen as functional and as cozy as the one Mr. Paul's designed and built for me, it makes entertaining that much more enjoyable.

When I was looking for bedroom furniture and couldn't find anything that I wanted, I went back to Mr. Paul's. Discussed with them what I wanted. They designed and built me a dressing table and built-in wardrobe/entertainment center that I am thrilled with.

If ever I was to do a kitchen, bathroom or have a piece of furniture built, I would never go anywhere else but to Mr. Paul's Custom Cabinets.
